

Software Engineering Intern

Pantas is transforming how businesses measure, manage and disclose their carbon emissions. We are setting a new standard in carbon accounting for enterprises.

We are looking for a software engineering intern to be part of the team in designing and building technology solutions to revolutionize how carbon related data are gathered, transformed, and managed.

You will join a talented, mission-driven team to revolutionize the carbon market. This is an opportunity to be exposed to the latest technology in Climate tech and engage with industry experts and participate in meaningful change that will transform current processes in green technology.

Why Pantas?

Pantas is a newly formed tech startup founded by 3 Malaysians with a combined work experience of over 30 years in Finance, Hedge Fund, Investment Banking, Management Consulting, Software Engineering and Startup in New York City. Their track record includes the successful sale of a data analytics startup to Bain & Company (US).

Pantas' investors include VCs based in Silicon Valley, private equity and hedge fund investors based in US, Europe, Hong Kong and Singapore and one of the largest conglomerates in Southeast Asia.

Pantas operates similar to a US-based startup and offers its team members a sense of ownership regardless of rank. It is a fast-paced organization with a flat management structure that focuses on enabling its team members to succeed in their careers.

About yourself, big picture:

- Emerging technologies excite you and you want to do something meaningful and transformative with technology
- You are positive, self-driven and hungry to learn
- You understand the power of collaboration and thrive in a team environment

As a member of a highly energetic and passionate Pantas engineering team intern, the exciting things you will get to do:

- Continue to evolve to a fully automated end-to-end testing of the platform
- Work on enterprise solutions based on web framework
- If you are interested, get hands on experience working with Machine Learning experts to classify and train machine learning models

What you'll need to succeed:

- Completed at least first year of a Bachelor's Degree or Diploma in Computer Science or any related discipline
- Has studied or experienced developing using any programming languages such as Python, Java or C++ with a little bit HTML/CSS
- Good understanding of object-oriented coding
- Basic understanding of database and SQL queries
- Excellent analytical and problem-solving skills
- Great communication capabilities across multiple mediums and disciplines

It's great if you have the following, it is not required:

- Has experienced using Python
- Understands Machine Learning concepts
- Familiarity with fundamentals of mathematical statistics and calculus
- Previous internship experience is a plus

You will be compensated for this internship position RM 1,200 monthly.

We celebrate diversity at our company and are proud to be an equal opportunity employer. We do not discriminate on the basis of race, religion, color, national origin, gender, age, marital status, sexual orientation or disability status.
